CERTIFICATION OF THE ACCOUNTING OFFICER AND STATEMENT OF THE EXECUTIVE DIRECTOR

CERTIFICATION OF THE ACCOUNTING OFFICER

I acknowledge my responsibility for the preparation and presentation of the annual accounts of eu-LISA in accordance with Article 102 of the Framework Financial Regulation (FFR) [1] and I hereby certify that the annual accounts of eu-LISA for the year 2022 have been prepared in accordance with Title IX of the FFR and the accounting rules adopted by the Commission's Accounting Officer, as are to be applied by all the institutions and union bodies.

I have obtained from the Authorising Officer, who certified its reliability, all the information necessary for the production of the accounts that show the eu-LISA's assets and liabilities and the budgetary implementation.

Based on this information and on such checks, as I deemed necessary to sign off the accounts, I have a reasonable assurance that the accounts present fairly, in all material aspects, the financial position, the results of the operations and the cashflow of the eu-LISA.

Andreas MILTSOS

Accounting Officer ad interim

STATEMENT OF THE EXECUTIVE DIRECTOR

I, the undersigned, Agnès Diallo Executive Director of the eu-LISA, in my capacity as Authorizing Officer declare that the information contained in this report gives a true and fair view.

State that I have reasonable assurance that the resources assigned to the activities described in this report were for their intended purpose and in accordance with the principles of sound financial management.

Confirm that I am not aware of anything not reported here which could harm the interests of the eu-LISA and the European Institutions in general.

Agnès DIALLO

Executive Director

[1] COMMISSION DELEGATED REGULATION (EU) 2019/715 of 18 December 2018 on the framework financial regulation for the bodies set up under the TFEU and Euratom Treaty and referred to in Article 70 of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council.

Introduction

The European Union Agency for the Operational Management of Large-Scale IT Systems in the Area of Freedom, Security and Justice was at first established by Regulation (EU) No 1077/2011 of European Parliament and of the Council of 25 of October 2011. At the end of 2018, Regulation (EU) 2018/1726 of the European Parliament and of the Council repealed Regulation 1077/2011 and broadened the mandate of eu-LISA, successor of the Agency established by the repealed regulation.

The Agency currently manages the European Dactyloscopy Database (Eurodac), the Schengen Information System (SIS II) the Visa Information System (VIS) with their respective communication infrastructures. New systems entrusted to the Agency by the broadened legal mandate, including the Entry/Exit System (EES), the European Travel Information and Authorisation System (ETIAS) and the European Criminal Records Information System for Third Country Nationals (ECRIS-TCN) are under development.

The broadened mandate also assigns responsibility for the implementation of interoperability between large-scale IT systems, foresees the increasing involvement of the Agency in the management of EU-funded research and requests the Agency to implement improved data quality control mechanisms. Furthermore, it envisages that eu-LISA carries out pilot projects and tests associated with system evolution and new system development work, permits the Commission and Member States to request ad hoc support from the Agency and allows a group of at least five Member States to request development, management and/or hosting common IT solutions on their behalf.

The seat of eu-LISA is in Tallinn, Estonia, whilst its operational centre is in Strasbourg, France. There is also a business continuity site for the systems under management based in Sankt Johann im Pongau, Austria and a liaison office in Brussels, Belgium.

The 2022 financial statements of eu-LISA and reports on budget implementation for 2022 are prepared in conformity with the provisions of Title IX “Annual accounts and other financial reporting” of the Financial Rules of eu-LISA, adopted by its Management Board with decision 2019-198 of 28/08/2019.

The accounts are drawn up in accordance with the accounting rules adopted by the Accounting Officer of the Commission. The accounting system of eu-LISA – in conformity to Article 82 of the Financial Regulation (EU, Euratom) (2018/1046) (FR) – serves to organise the budgetary and financial information in such a way that figures can be entered, filed and registered. The accounting system consists of general accounts and budget accounts. The accounts are kept in euro on the basis of the calendar year.

The Accounting Officer of the Commission shall, in accordance with Article 80 of the FR, after consulting the accounting officers of the other institutions and of the bodies referred to in Section 2 of Chapter 3 of Title IV, adopt the accounting rules to be applied by all the institutions, European Offices and Union bodies that shall be based on internationally accepted accounting standards for the public sector. Hence, eu-LISA follows the rules and principles as laid down by the Commission`s Accounting Officer.

2. Notes to the Financial Statements

↳ Accounting policies

In accordance with Article 51 of the Financial Rules of the European Union Agency for the Operational Management of Large-Scale IT Systems in the Area of Freedom, Security and Justice, approved by Management Board Decision No 2019-198 of 28/08/2019 (hereinafter "eu-LISA FR"), the Accounting Officer of the Agency shall apply the EU accounting rules and the harmonised chart of accounts adopted by the Accounting Officer of the Commission based on International Public Sector Accounting Standards (IPSAS).

In accordance with Articles 97 - 98 of the eu-LISA FR, the financial statements present information, including information on accounting policies, in a manner that ensures it is relevant, reliable, comparable and understandable. eu-LISA accounting rules that lay down the structure and content of the financial statements, as well as the accounting principles underlying the accounts, do not diverge from the rules adopted by the Commission`s Accounting Officer.

The applied accounting principles are the following:

- Going concern basis
- Prudence
- Consistent accounting methods
- Comparability of information
- Materiality
- No netting
- Substance over appearance
- Accrual-based accounting

The budget implementation reports respect the budgetary principles laid down by the FR as follows:

- Unity and budgetary accuracy
- Annuality
- Equilibrium
- Unit of account
- Universality
- Specification
- Sound financial management and performance
- Transparency

Application of new and amended EU Accounting Rules (EAR)

There is no new EAR which became effective as of 1 January 2022.

↘ Use of estimates

Preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts presented and disclosed in the financial statements. The significant estimates and assumptions require judgement and are used for, but not limited to, accrued income and charges, provisions, contingent assets and liabilities. Actual results reported in future periods might differ from these estimates. Changes in estimates are reflected in the period in which they become known.

↘ Legal Framework - Accrual accounting standards at eu-LISA

The accounting system of eu-LISA comprises of general ledger accounts and budget accounts. These are kept in Euro, based on calendar year, in accordance with the provisions of Article 98 of the eu-LISA FR.

The general accounts allow for the preparation of the Financial Statements as they show all revenues and expenses for the financial year irrespective of the time of cashing. They are designed to establish the financial position of eu-LISA in the form of a Balance sheet and Statement of financial performance at 31 December each year.

The budget accounts give detailed picture of the implementation of the budget on cash basis.

The Agency applies accrual-based accounting. Therefore, the Financial Statements show all the charges and income for the financial year, regardless of the date of payment or collection.

For financial management purposes, eu-LISA is making use of the ABAC Suite based on service level agreement concluded with the Commission. ABAC is a transversal, transactional information system allowing for the execution and monitoring of all budgetary and accounting operations of the Agency. The system is maintained by the Commission and includes a comprehensive set of features to ensure compliance with the Financial Regulation (FR).

The ABAC-platform offers functionalities covering the following business areas:

- Management of Legal Entities & Bank Accounts
- Registry of Legal Commitments (procurement contracts and grants included)
- Budgetary structure, appropriations and commitment management
- Management of Expenses: invoicing, paying, pre-financing
- Management of guarantees
- Management of Income
- Assets management
- Treasury management
- Direct posting to the general ledger accounts of all transactions
- Reporting on budgetary execution and support of sound financial management.

The integrated information system is managed and maintained by the European Commission, validated by the Accounting Officer of the Commission and periodically re-validated by eu-LISA`s Accounting Officer.

2.1. Notes to the Balance Sheet

2.1.1. Non-current assets

“Non-current” or “fixed” assets are stated at historical cost, less depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset’s carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to eu-LISA and the cost of the item can be measured reliably. Such subsequent expenditures depreciate according to the remaining useful life of the original asset. All other repair and maintenance costs are charged to the statement of financial performance during the financial period for which they are incurred.

The tangible asset recognition threshold for financial statements is € 5,000. Items recognized in the inventory with a unit price lower than € 5,000 are considered as expenses and they are included directly in the Statement of financial performance as low-value asset expenses as they incur. The capitalisation threshold for Internally Generated Intangible Asset (IGIA) is € 50.000. Items purchased for over € 100 are part of management inventory; items over € 5,000 constitute the Agency’s financial inventory.

The Agency is following up its IT developments via a dedicated - transitory - general ledger account. The open balance, i.e. costs incurred related to not yet operational IT projects (still in development phase at year-end) is reclassified to fixed assets as part of the year-end adjustments by the accountant. Such amount is categorized as “manual assets under development” on the face of the Balance Sheet. Assets under development are not amortized.

Impairment review for the 2022 closure did not indicate any adversarial European policy trend that would necessitate book value adjustment for intangible assets; the Agency continues its operations with enhanced mandate on going concern basis. As for tangible fixed assets, there is neither a market trend or similar that would prompt the Agency to devalue its active items on inventory. The physical inventory count covered 96 % of trackable units in 2022.

The depreciation charge is calculated monthly using the straight-line method in order to allocate assets’ acquisition value over their estimated useful lives, as shown overleaf.

Internally generated intangible assets (IGIA)	25%

eu-LISA has adopted the same depreciation percentages as the ones implemented by the European Commission. As a result, eu-LISA's individual accounts for fixed assets and associated expenses (depreciation / amortization) need no adjustments for consolidation purposes as assets are valued based on the same underlying assumptions.

An intangible asset is an identifiable non-monetary asset without physical substance. Computer software includes off-the-shelf (COTS) licences and the internally generated intangible assets, related to core systems' developments and evolutions.

The **Computer Software** addition in 2022, amounting to € 11,485,109 broken down by budgetary source is visualized below. Entry/Exit System (EES) developments are taking the lead followed by SIS system development.

Further details of the book value of **Intangible Assets under Construction** of € 66,969,819 is below, together with previous year-end data for comparison.

Entry/Exit System related ongoing development accounts for 72 % of the total work in progress of intangibles. Decommissioning (disposals) of assets is carried out as part of normal course of business, a natural consequence of regular inventory controls. In case items are identified as obsolete, damaged, not in use anymore (being replaced with newer/updated components) etc. the responsible administrative entities initiate decommissioning workflow. No intangible assets were disposed in 2022.

2.1.1.2. Property, plant and equipment (Tangible assets)

Tangible items acquired with purchase price € 5,000 or above and a period of use longer than one year are recorded in the tangible assets sub-ledgers. Items with unit price over € 100, nevertheless, are registered in the management inventory of the Agency maintained for operational management purposes, specifying the responsible user and location assigned.

The assets are valued at their acquisition price, less depreciation and impairment. The depreciation method chosen is the monthly straight-line method. EU Accounting rule 7 “Property, Plant & Equipment” applies accordingly.

2.1.1.3. Long-term pre-financing

EU Accounting Rule No 5 defines the accounting treatment of pre-financing transactions of EU bodies. It applies to the classification, presentation, recognition and measurement of pre-financing. Pre-financing is a cash advance, i.e. the payments are made before the expenditure is declared eligible or before the delivery of goods or services. If the recipient does not incur eligible expenditures, it has the obligation to return the pre-financing advance to the Agency. This right or claim of the Agency towards the beneficiary is an asset. The counterpart of the recognition of the asset is the cash transaction and thus has no impact on the statement of financial performance. Pre-financing is initially measured at the amount of the consideration given; on subsequent balance sheet dates, measured at the amount initially recognized on the balance sheet less eligible expenses.

eu-LISA paid administrative pre-financing to the constructor of its office building in Strasbourg, France, back in 2016 out of which € 2,546,822 remains open to be settled. Performance guarantee in respect to the building project is booked as an off-balance sheet item, face value at year-end 2022 is shown below.

	In EUR
Performance Guarantees	2022
Related to building in SXB	1,291,815
Related to the implementation of ICT Systems	995,994
Total	2,287,809

At year-end 2022, the Agency did not accrue expenses in respect of the given pre-financing. No impairment is booked either. At the time of drafting the 2022 annual accounts litigation is still ongoing between the Agency and the construction company. See also other significant disclosure paragraph in chapter 2.1.5.

2.1.1.4. Non-current exchange receivable - deposit

The amount of € 137,797 corresponds to three-month rent as a security deposit that the Agency had to pay related to long-term rental of temporary offices in Strasbourg. The deposit varies in the same proportion as the main rent by application of an indexation in order to be permanently equal to three months actual rental. The term of the lease is for nine years. Deposit is repayable at the end of the lease term.

2.1.2. Current Assets

2.1.2.1. Current Exchange receivables – Deferred charges

Deferred charges are expenditures incurred in the current or previous financial years where the corresponding service meant to cover future periods. Such pre-payments are for example eu-LISA`s contribution to the European School in Tallinn and Strasbourg, maintenance payments for application licences/IT supplies, subscriptions, renewals of certifications. Those amounts are gradually reversed to the Statement of financial performance by increasing the expenses for the actual financial periods they meant to cover, ensuring fair presentation of revenue/expenses for a given financial year.

Total	13,307,960	16,094,899	(2,786,939)

2.1.2.2. Current Exchange receivables – Other exchange receivables

In accordance with EU Accounting Rule No. 4 and No. 17, all revenue needs to be split into revenue from exchange transactions and revenue from non-exchange transactions. The same split is required for the receivables. In a non-exchange transaction, an entity receives (gives) value from (to) another entity without directly giving (receiving) approximately equal value in exchange. The following tables highlight the material items shown on the face of the Balance sheet among Exchange receivables.

in EUR

	31/12/2022	31/12/2021	Variation

↳ Centralised treasury

With effective date of 16 June 2014, eu-LISA implemented Centralised Treasury Management with the European Commission, DG BUDG. By doing so, the Agency effectively contributes to economizing on Member States (MS) financial resources, as there is no need to keep substantial buffer funds for payment execution that would need to be sourced from MS' national banks in advance. At the same time, the Agency is saving funds by avoiding paying negative interest.

The Centralised Treasury Management with DG BUDG includes the following services:

- Bank execution of all payments;
- Cash management;
- Follow-up of exceptions related to payments executed;
- Reception of payments;
- Control of cost and revenue related to banking services;
- Management of relationship with banks (including contracts management and tender procedures);
- Treasury related risk management.

Under the Centralised Treasury Management, eu-LISA does not have its own bank account but all transactions are executed via the Commission payment architecture. Payments are processed on T+3 days' term following validation by the Authorising Officer.

The balance of the automatic (outgoing payments) and manual liaison account (incoming payments) replaces the bank account and represents the net "virtual" treasury position of the Agency. As DG BUDG is not a financial institution the virtual cash balance shall not be classified among "Cash and cash equivalents" on the face of the Balance Sheet.

Total non-exchange receivables	7,668,763	33,529,267	(25,860,504)

In accordance with Art. 151(1)(aa) of the VAT Directive² the EU institutions are exempted from VAT. It can either be direct exemption or via reimbursement method. In Estonia, the Agency is directly exempt from paying VAT on local purchases since 2017. VAT receivables in the Balance Sheet are the outstanding VAT with France, Norway and Iceland, where the initially paid VAT is reimbursed to the Agency once a year.

The credit risk exposure is considered insignificant on the outstanding VAT amount due to France and the associated countries being rated as prime/high grade debtors by external rating companies.

The ageing of outstanding invoices at year-end is appropriate, no material overdue items.

↘ Goods received not invoiced

The **Goods received not invoiced** account balance decreased by 6% compared to previous year. Nevertheless, it still has substantial balance due to deliveries, where the corresponding invoicing milestones were not reached, acceptance conditions not fulfilled, or invoices were either not received or not approved by the current balance sheet date. Comparative overview of budgetary source of fixed asset deliveries not invoiced by year-end is presented below.

↘ Balancing subsidy

Balancing subsidy pre-financing open amount is the result of the 2022 Budget Outturn calculation. Out of the total pre-financing subsidy of € 296,508,265 cashed from the Commission, € 270,226,598 is accounted for as revenue that the Agency recorded in its Statement of financial performance. € 26,281,667 is the remaining amount of the balancing subsidy that will need to be returned to the Commission during 2023 as excess subsidy. Please see chapter 3.2 Budget Outturn Account 2022 for details.

2.1.3.2. Accrued charges

Accrued charges are recorded in order to respect the notion of accrual-based accounting; therefore, the Financial Statements show all the charges and revenues for the financial year, regardless of the date of payment or collection. Amounts are based on best possible professional estimates taking into account the value of goods and services received in 2022 by the Agency to which no corresponding invoices were registered by the balance sheet date. These are expenses, which relate to financial year 2022 even if actual invoicing and payments happen in 2023.

	in EUR		
	2022	2021	Variation
Accrued charges	41,524,343	43,712,937	(2,188,595)

Total accrued charges	41,524,343	43,713,125	(2,188,783)

The year-end balance of accrued charges represents 5% decrease compared to 2021, is distributed per nature of expense as follows:

	in EUR	
	2022	2021
Operational activities	35,483,571	39,116,263

Total accrued charges	41,524,343	43,712,937

At year-end 2022, the Agency has no foreign exchange risk exposure as all receivables and payables are denominated in Euro.

2.1.4. Net assets – changes in net assets

The statement of net assets contains the economic result of the year (profit of € 42,879,247) and the accumulated surplus from the previous years.

2.1.5. Significant disclosures

2.1.5.1. Legal commitments without corresponding budgetary commitments

The Agency has long-term/multi-annual contractual commitments without corresponding budgetary commitments³ for € 15,126,368 at year-end 2022. An overview is given in the table below. The Agency will need to tie financial resources to those contractual obligations in the coming budgetary period.

2.1.5.2. COVID pandemic

In 2022, lasting effects of the coronavirus outbreak continued to influence eu-LISA's operations and services delivered to the Member States, as well as its internal working modalities.

The Agency managed to maintain the coordination and cooperation with the Member States in the field of internal security, border management and migration. It ensured uninterrupted availability of the existing large-scale IT systems (SISII, EURODAC, VIS) and further progress with the implementation of Entry/Exit System (EES), European Travel Information and Authorization System (ETIAS), Interoperability package, SIS Recast and ECRIS-TCN. Nevertheless, global pandemic affected planned activities of eu-LISA in two aspects:

- first, while work on planned projects continued, there were changes in their implementation plans that impacted delivery and acceptance of certain deliverables and/or start of particular activities;
- second, preparation and launch of planned procurement procedures through the year did not follow at all times initially planned timelines, mainly due to delays in the preparation of offers on the part of contractors.

All that had certain effects on the planned implementation of the Agency's budget. The Agency reached a budget implementation of 91.1% in commitment and 91.6% in payment appropriations.

³ For recurring administrative expenditure, as foreseen by Article 74(2) of the eu-LISA FR.

Internally, eu-LISA continued to apply the measures designed in 2020 as response to the COVID pandemic and has successfully ensured business continuity. The operation model of eu-LISA was almost completely virtualized with the exception of the activities that require physical access to the systems and infrastructure managed by eu-LISA. Starting in September, a partial re-entry plan was implemented, whereby staff who were previously authorised to work remotely on a 100%, needed to ensure an office presence of minimum 40% on a weekly basis.

The following major effects of the lasting pandemic situation shall be highlighted:

- several meetings of the governance bodies of eu-LISA continued to be organized virtually and digitalization of internal workflows continued at high pace;
- the number of missions through the year continued to be limited and much lower than the time prior COVID pandemic, although higher than in 2021;
- the pace of recruitment of new staff increased compared to 2021, however still remained lower than originally planned, which led to the increase of use of external contractors to bridge the gap between planned and available staff in the Agency for implementation of its Annual Work Program;

Overall, eu-LISA successfully addressed the challenges through the year demonstrating maturity of its internal control system and its resilience.

2.1.5.3. *Implementation of Entry Exit System (EES)*

It should be noted that the timeline for the implementation of Entry/Exit System (EES) as set out in the 2016 Legislative Financial Statement (LFS) indicated the beginning of 2017 as start of the project implementation whereas the EES legal base was only adopted on 30 November 2017 and the relevant implementing acts were adopted in 2018 and 2019.

The initial scope of the project was further modified with the adoption of the regulations establishing for the European Travel Information and Authorisation System - ETIAS (Regulation (EU) 2018/1240) and Interoperability (Regulation (EU) 2019/817 and 818) which introduced additional requirements not initially foreseen. This has triggered the need for additional implementing acts in 2021 and 2022.

In addition, the Agency experienced difficulties with the consortium contracted for the implementation of the EES.

eu-LISA reported to the Management Board who informed the Council of the need to postpone the entry into operation of the EES. The eu-LISA Management Board after careful consideration of the development of the system and taking into account the ongoing performance issues of the contractor, concluded that the planned Entry in Operation of the EES in 2022 was not feasible.

Due to dependencies with the EES, the development and entry in operation of the shared Biometric Machine Service (sBMS) was also delayed.

The Agency is assessing the additional costs incurred due to the delays described and the additional requirements to determine appropriate measures for resolution.

2.1.5.4. Contingencies

The cases of litigation notified in the Notes to the 2018 annual accounts related to the first extension project of the Strasbourg site are still ongoing while drawing up the 2022 annual accounts.

The general contractor for the office/data-centre building project in Strasbourg initiated its first procedure founded on alleged delay suffered during the conceptual development phase of the building project. The contract between eu-LISA and the general contractor does not foresee such payable. The known claim pending before the Administrative Court of Strasbourg amounts to € 703,904 plus 7.9% interest (starting from 17 November 2017) and procedural costs. The Agency opposes the financial claims on the grounds of the signed contract amendments. The second court proceeding is about the need to establish (by the judge) on which date the takeover of the building shall take place. The Agency - so far - refused to accept formally the building due to contractual breaches.

After the judgements of 3 August 2020 of the Administrative Court of Strasbourg, where that Court judged the two cases in the Agency's favour, the applicant appealed both of the judgements to the Administrative Court of Appeal of Nancy. The Agency submitted its defences in both cases within the deadline of 5 March 2021, and the case is currently pending before the Administrative Court of Appeal of Nancy. The Court suggested to the two parties to settle the case by mediation procedure. The first session took place on 24 March and a second one on 11 May 2023 in Nancy, France. An agreement to be signed by both parties is currently under preparation. Based on in-house and external lawyer's assessment and on the grounds of the won first instance, no provision shall be booked, the matter is regarded as contingency.

The long-term given pre-financing on the Balance sheet remaining open with the contractor is not impaired either; on one hand the pre-financing is partially supported by a third-party guarantee, on the other hand, there is no evidence that would necessitate such devaluation at this stage.

The Agency has three pending cases at the General Court of the European Union with subject matter of "Staff Regulations of officials and Conditions of Employment of other servants". The possible financial impact is not material for further quantification and disclosure.

2.1.5.5. Related party disclosures

During 2022 the highest staff grade at the Agency was the Executive Director, temporary agent in grade AD15, whose term in office ended on 31 October 2022. As from 1 November 2022 the Executive Director ad interim, temporary agent in grade AD13, was appointed. The Staff Regulations of Officials and the Conditions of Employment of Other Servants⁴, which regulate his remuneration too, govern his employment contract. Apart from transactions stemming from the employment relationship, there are no other type of transactions between the Agency and the Executive Director as well as the Executive Director ad interim, as key management personnel, and neither any loans were provided to him on standard or preferential rate.

⁴ Regulation No 31 (EEC), 11 (EAEC), laying down the Staff Regulations of Officials and the Conditions of Employment of Other Servants of the European Economic Community and the European Atomic Energy Community.

2.1.5.6. *Outstanding budgetary commitments not yet expensed (accounting RAL - reste à liquider)*

The accounting RAL represents the budgetary RAL less related amounts that have been included as expenses in the current year's statement of financial performance. The *budgetary RAL* is an amount representing the open budgetary commitments at year-end for which payments and/or de-commitments have not yet been made. This is the normal consequence of multi-annual programmes.

	in EUR	
	2022	2021
Accounting RAL	290,511,471	318,628,222

The *outstanding budgetary commitments not yet expensed* (accounting RAL) represent the correction of the budgetary RAL with the estimated costs, which are determined by applying accrual-based principle not reflected in the budgetary result, where the cash-based principle is followed.

2.2. Notes to the Statement of financial performance

2.2.1. Revenues – Non-exchange revenues

Non-exchange revenues	286,701,270	292,936,582	(6,235,312)

Subsidy revenue from the Commission on the face of the Statement of financial performance for 2022 solely consists of the Balancing subsidy, that is the main source of financing of the Agency from the general budget of the European Union (for its calculation see 2022 Budget outturn account table under heading 3.2).

2.2.1.1. Contribution of EFTA countries

The contribution from the countries associated with the implementation, application and development of the Schengen acquis and Eurodac-related measures for 2022 amounts to € 16 million.

2.2.3. Operational expenses

The table below is providing a high-level breakdown of the operational expenses by breaking down the cash-based expenses and accruals. The value of primary transactions data corresponds to the invoices paid during the financial year (primary transaction data – cash based), which are then adjusted to show the operational transactions in the period when services are rendered and goods are delivered (corresponding to accrual based financial reporting method⁵). Such adjustments ensure comparability of reported data over the years.

in EUR

	2022	2021	Variance	in %
Primary transaction data	134,095,677	109,625,796	24,469,881	22 %

Total operational expenses	127,063,564	132,513,317	(5,449,753)	-4 %

For further insight into the depths of what happened at the Agency during the financial year, please refer to the Consolidated Annual Activity Report for 2022. That is the statutory report, which is meant to give detailed overview of major programmes, projects, operational and administrative activities in reference to what was planned for the business year.

2.2.4. Administrative expenses

2.2.4.1. Staff expenses

The total amount of € 36,101,247 is split per nature of expenditure as follows:

in EUR

	2022	2021	Variation
Staff basic expenses	26,729,410	22,797,035	3,932,374
Social security contribution	850,653	772,047	78,606
Staff perq. and social activities	422,505	17,381	405,123
Salary allowances	7,550,705	6,748,601	802,103
Allowances for SNEs	547,974	542,797	5,178
Total staff expenses	36,101,247	30,877,862	5,223,384

Staff basic expenses include temporary agents' basic salaries and contract agents' full salaries including all their allowances.

⁵ Accrual and deferral are accounting adjustment entries with a time lag in the reporting and realization of income and expense. An accrual of an expense refers to the reporting of an expense and the related liability in the period in which they occur, and that period is prior to the period in which the payment is made. A deferral occurs when the Agency paid out money that should be reported as an expense in a later accounting period.

Social security contribution consists of the employer's contribution to accidents insurance, sickness insurance and unemployment allowance.

Salary allowances are employer's expenses incurred for education, nursery, household, dependent child, expatriation, daily subsistence, installation, etc. allowances payable on top of basic salaries to staff members, and remunerations to interns.

Allowances paid to seconded national experts are separately reported under dedicated general ledger account.

The salaries of eu-LISA's staff are calculated by the Office for the Administration and Payment of Individual Entitlements of the Commission (PMO) according to Service Level Agreement between the two institutions. The Agency provides PMO with all the necessary supporting information that allows PMO to establish individual entitlements. The Agency is responsible for checking and processing the payments to the individuals.

The remuneration of the officials and other servants of the European Union is updated taking into account the economic and social situation of the Union. The update is implemented in accordance with Article 65 of the Staff Regulation applicable to officials and other servants of the European Union.

IT costs - operational maintenance expenses (€ 4,150,623) are incurred when the nature of the expenditure does not fulfil all the requirements for registering those as fixed asset additions e.g. licence maintenances related to corporate IT systems and external support services related to corporate IT. The activity breakdown for the **IT cost - research** expenses is presented overleaf.

Budgetary source of expense	2022	2021
EES projects	22%	2%
SIS II recast	60%	11%
VIS/BMS projects	18%	87%
Grand Total	100%	100%

The **Office Supply** ledger is used to expense small-value corporate asset items above € 100 but below the fixed asset recognition threshold of € 5,000.

2.2.4.3. Other external service provider expenses

The volume of the other external service provider expenses kept on growing during 2022, indicating long-lasting reliance on external resources, which is the result of not sufficiently available posts in the Agency's establishment plan.

	in EUR		
	2022	2021	Variation
Other external service provider expenses	6,360,820	4,575,529	1,785,291

2.2.4.4. Fixed assets related expenses

Total fixed asset related expenses	61,780,865	51,700,205	10,080,655

Most important fixed assets related expenses are the amortization and depreciation which are expected to increase over the years as a direct consequence of the Agency's widening operational scope and growing overall operational budget for the various system development initiatives, that result in increasing fixed asset purchases. Please also refer to detailed fixed assets movement tables in 2.1.1.

2.2.4.5. Operating lease expenses

	in EUR

Other operating lease	138,926	109,470	29,456
Total operating lease expenses	713,280	672,865	40,415

Building related lease expenses refer to rental costs the Agency pays for the liaison office in Brussels and for the temporary offices in Strasbourg. In France, the rental start date was from December 2020, hence the low comparative. The expense under other operating lease refers to the cost of the Agency's website hosting.

The amounts to be paid during the remaining term of the building related operating lease contracts are as follows:

	in EUR			
	< 1 year	1-5 years	> 5 years	Total

Expenses with consolidated entities relate mostly to execution of service level agreements between the Agency and the respective directorate generals/other bodies of the European Union.

2.2.4.7. Finance cost on late payment

During 2022 the Agency paid € 9,048 of interest on late payment. Late payment charges are automatically due if the interest amount exceeds € 200.

3. 2022 Budget implementation

3.1. Budgetary implementation

In 2022 eu-LISA managed a budget of € 319.64 million in commitment appropriations and € 296.51 million in payment appropriations received as EU contribution.

Summary of budget implementation – budget of the year

The Agency's budget implementation rates by the end of the year 2022:

99.0% for commitment appropriations, taking into account the non-automatic carryover of commitment appropriations authorised by the Management Board in February 2023⁶ as summarised in the table below:

Commitment appropriations (in € million)				
2022 budget implementation as of 31/12/2022			Budget implementation with carryover by decision	
2022 final adopted budget	executed commitments	% implemented	non-automatic carryover	% implemented taking non-automatic carryover into account
319.64	291.29	91.1%	25.15	99.0%

91.6% for payment appropriations including the carry-forward of administrative expenditure to 2023.

Summary of revenue and expenditure

1. Revenue

- i. EU contribution. The balancing subsidy received in 2022 amounted to € 296.51 million requested in four instalments.
- ii. Associated countries⁷ contribution. In accordance with the agreements⁸ between the EU and the countries associated with the implementation, application and development of the Schengen acquis, the Agency establishes the associated countries contribution based on: direct expenditure for the VIS, SIS, EURODAC and EES systems of the previous year, as well as indirect corporate and operational expenditure. The contribution is calculated according to the percentage of the associated countries' GDP on the total GDP of all participating Member States for SIS II, VIS, Eurodac and EES. Due to the late availability of complete GDP data in EUROSTAT, the final amounts due for year n-1 are established at the end of year n, submitted for review to the associated countries, and recovered in year n and n+1.

Out of the revenue due from associated countries in 2022:

- € 24,405,313 for contributions related to 2020 expenditure, was collected in 2022;
- € 17,715,706 representing the majority of contributions related to 2021 expenditure, for which recovery was initiated and collected in 2022;
- € 6,343,406 for contributions related to 2021 expenditure was not collected in 2022 as the recovery orders are issued at year end. They are due for collection in 2023.

Details are provided at point 3.1.1 (item 20-0) and 3.1.3.5.B for 2022 collection and outstanding amounts.

- iii. Miscellaneous revenue. Internal assigned revenue received in 2022 summed up to € 22,322.

2. Expenditure

As regards the implementation of the budget of the year (fund source C1), eu-LISA reached the following budget implementation rate by the end of the year:

99.0% for commitment appropriations (including the carryover by decision);

91.6% for payment appropriations, including the carry-forward of 2022 administrative expenditure to 2023.

- i. Commitment appropriations: Title 1 reached an implementation rate of 92.3%, Title 2 reached an implementation rate of 100.0%, while Title 3 also reached an implementation rate of 100.0% (including non-automatic carryover approved by the Management Board) by the end of the financial year 2022.
- ii. Payment appropriations: 90.6% of appropriations in Title 1 were executed and 1.6% automatically carried forward. In Title 2, the execution rate reached 46.2% and the remaining 53.8% has been automatically carried forward to 2023. In Title 3, 90.5% of appropriations were executed.

Budgetary transfers

During 2022, the following 9 internal transfer operations were performed under Article 26 of the eu-LISA FR. The rationale for the transfers was to ensure optimal budget allocation of commitment and payment appropriations. The table at section 3.1.3.6 provides details of the budgetary transfers performed in 2022. Details of executed transfers by budget line are provided in section 3.1.3.1.

No transfer under Article 26(2) of the eu-LISA FR was performed.

Council Decision (EU) 2011/350 on the conclusion, on behalf of the European Union, of the Protocol between the European Union, the European Community, the Swiss Confederation and the Principality of Liechtenstein on the accession of the Principality of Liechtenstein to the Agreement between the European Union, the European Community and the Swiss Confederation on the Swiss Confederation's association with the implementation, application and development of the Schengen acquis, relating to the abolition of checks at internal borders and movement of persons (OJ L 160, 18 June 2011, p. 19-36);
Council Decision (EU) 2011/351 on the conclusion of a Protocol between the European Union, the Swiss Confederation and the Principality of Liechtenstein on the accession of the Principality of Liechtenstein to the Agreement between the European Community and the Swiss Confederation concerning the criteria and mechanisms for establishing the State responsible for examining a request for asylum lodged in a Member State or in Switzerland (OJ L 160, 18 June 2011, pp.37-49);
Council Decision (EU) 2019/837 on the conclusion, on behalf of the Union, of the Arrangement between the European Union, of the one part, and the Kingdom of Norway, the Republic of Iceland, the Swiss Confederation and the Principality of Liechtenstein, of the other part, on the participation by those States in the European Agency for the operational management of large-scale IT systems in the area of freedom, security and justice (OJ L 138, 24 May 2019, p. 9-29)

Cancellation of appropriations – budget of the year

€ 3.19 million of commitment appropriations and € 25.04 million of payment appropriations remained unused (and therefore cancelled) at the end of the year 2022.

Cancellation of appropriations carried over from 2021, and previous financial years (differentiated appropriations only)

The planned carry-forward from 2021 to 2022 of a number of commitment appropriations was justified by:

- the multi-annual nature of operations, procurement procedures, or projects;
- events beyond the Agency's control (e.g. invoices not received at year-end, or delays in the acceptance process).

In the case of non-differentiated appropriations (staff and running costs), such carry forward was accompanied by a corresponding carryover of payment appropriations.

These operations were performed in compliance with the formal requirements set by the eu-LISA FR. The execution of the carry-forwards and carryovers was constantly monitored throughout the year, resulting in cancellations whenever the justification of expenditure was no longer valid.

In total for non-differentiated appropriations, € 1.25 million out of € 11.81 million were cancelled (10.6%).

As regards differentiated committed appropriations (Title 3) carried forward from previous years, € 1.11 million were cancelled out of € 349.36 million (0.3%).

Carry-forward and over of appropriations to 2023

The multi-annual nature of operations, procurement procedures, contracts or projects used to support core operations, as well as events beyond the Agency's control (e.g. invoices not received at year end, or delays in the acceptance process), justify planned carry forward of open commitments and associated payment appropriations to 2023, for a total of € 14.38 million in Title 1 and 2 (non-differentiated appropriations) and € 195.88 million in Title 3 (differentiated appropriations) out of which € 25.15 million were carried over by Management Board decision.

3.2. Budget outturn account 2022

The budget outturn for the financial year corresponds to the total EU Contribution and other external/internal assigned revenues cashed, minus the total eligible expenditures incurred during the financial year (executed payments and appropriations carried over) adjusted with items originating from the previous financial year. The purpose of this calculation is to determine the amount of balancing subsidy that is considered as revenue of the Agency out of the pre-financing balancing subsidy cashed for the year.
